INTERACTIVE PHOTO WALL

<http://camtronic.fr>

[contact@camtronic.fr](mailto:contact@camtronic.fr)

**Wallee** is an interactive photo wall. During an event, it displays real-time photos taken by participants with their smartphones.

With **Wallee**, no need for an Internet connection, the box is autonomous and generates its own Wi-Fi network. The installation is childishly simple : a plug, a screen and... a Wallee! Each participant can then send his photos directly to the box via his Smartphone.

At the end of the event, all photos can be retrieved on a simple USB key.
